

JurisFlow - Complete Matter Lifecycle (Business Analysis v1)

Purpose

This document describes the complete end-to-end lifecycle of a legal matter from the first client contact through closure and archiving. It is intended as the business blueprint for the JurisFlow Law Practice Management System.

1. Client Intake

Capture enquiry, client profile (individual/company), contact details, conflict parties, legal issue, preferred lawyer, urgency, referral source, uploaded documents, KYC, consultation appointment. Possible outcomes: Reject, Schedule Consultation, Proceed to Conflict Check.

2. Consultation

Lawyer meets client, gathers facts, reviews documents, gives preliminary advice, estimates scope and fees.

3. Conflict Check

Search existing clients, matters, related parties and opponents. Record cleared/failed with reasons.

4. Engagement

Generate engagement letter, fee agreement, retainer request, client acceptance, open client account.

5. Matter Opening

Generate matter number, assign category, practice area, partner, associates, privacy, opposing counsel, shelf, status=open.

6. Matter Planning

Create milestones, tasks, hearings, deadlines, team assignments, document checklist, risk assessment, budget.

7. Active Matter Work

Notes, documents, correspondence, emails, phone logs, meetings, research, drafting, evidence, witness management, court filings, approvals, client updates.

8. Hearings / Transactions

Court appearances, negotiations, ADR, settlements, conveyancing, registrations, company filings depending on matter type.

9. Financial Management

Time recording, expenses, invoices, trust funds (where applicable), receipts, payments, outstanding balances.

10. Collaboration

Internal notes, approvals, delegated work, notifications, reminders, audit trail.

11. Client Portal

Matter progress, shared documents, invoices, required actions, secure messaging, appointments.

12. Review

Partner quality review, confirm deliverables complete, confirm billing complete, obtain client feedback.

13. Matter Closure

Record outcome (judgment, settlement, completed transaction, withdrawn etc.), close tasks, final invoice, closing letter.

14. Archiving

Archive digital and physical files, retention schedule, restore capability, archived search.

Cross-Cutting Features

Role permissions; document versioning; e-signatures; notifications; calendar; audit logs; reporting; dashboards; full-text search; AI-ready document classification; backups; API integrations.

Recommended Matter Status Flow

Inquiry → Consultation → Conflict Check → Engagement Pending → Open → Planning → Active → Waiting for Client → Waiting for Third Party/Court → Billing Pending → Under Review → Closed → Archived

Note: This is Version 1. The next document should expand every stage into detailed workflows, database tables, user stories, screen mockups, permissions, state diagrams, and UML suitable for full system implementation (estimated 80–150 pages).
